

100 x useful borders!

Cities are evolving every day, changing their concept of life and architecture towards a life without brightness and nature. Why don't we create something, which solves our problems for now, survives for decades and becomes part of our identity? / This is how we came with the idea of the Bollard Hats. Bollards happen to be placed all around Prishtina. Their only function these days is to prevent the cars to park on the side walk, otherwise they just meaningless. That's the reason why we dedicated to modify them a bit. We already know that Prishtina is thinking of adding bollards in Pejton. Our only change is to make it multifunctional and we achieved it through our idea. Also, it's a project, which can be used on the existing ones so it's cheaper to apply them. Its unique design provides the ability to be changeable and removable, according to the situation. The fact that we came up with 100 ideas for these hats in less than 3 days tell that there are so many ways for them to be applied.
