NEW AIR FOR OLD TOWN

GÖZTEPE

- No collective plan
- No collective space
- No collective gain

?

STRATEGY

- Reveal and bring into play valuable historical elements
- Unite smaller plots to form an integrated vision of the area
- Create new public space and generate addresses around it

I think train station should be opened. I am happy to live here. I don't want the historical texture to be changed.

I don't want any new constructions to be built. I want train station to be opened again. I am working at Göztepe since 30 years . If they open train station my works will be better. I think Göztepe is changing many places one demolished.

Train station should be operated. I am unhappy about traffic and because of this people should use train. There is action at the location where tradesmen are so, **it will be good if there is a train station working.**

Train station shouldn't be destroyed, it should be opened. I am satisfied with the location of Göztepe but I am not happy about absence of train . I am living in Gebze and I have to use car to get Göztepe. I am working at Göztepe for 30 years. I am the biggest victim here. If you open the station , I will give one of my salary to you.

Train station should be rebuilt. I am pleased to live in Göztepe. It will be very beneficial , if train station is built again.

GOZTEPE PEOPLE WANT TRAIN STATION TO BE PRESERVED
