

## A. ANALYSIS

### SITE: DIMITRIOU GOUNARI STREET

\_axis which connects the monument of Rotunda and the sea front

### CHARACTERISTICS:

- \_historical importance
- \_cultural differentiation
- \_connection between the sea and the forest through the city grid

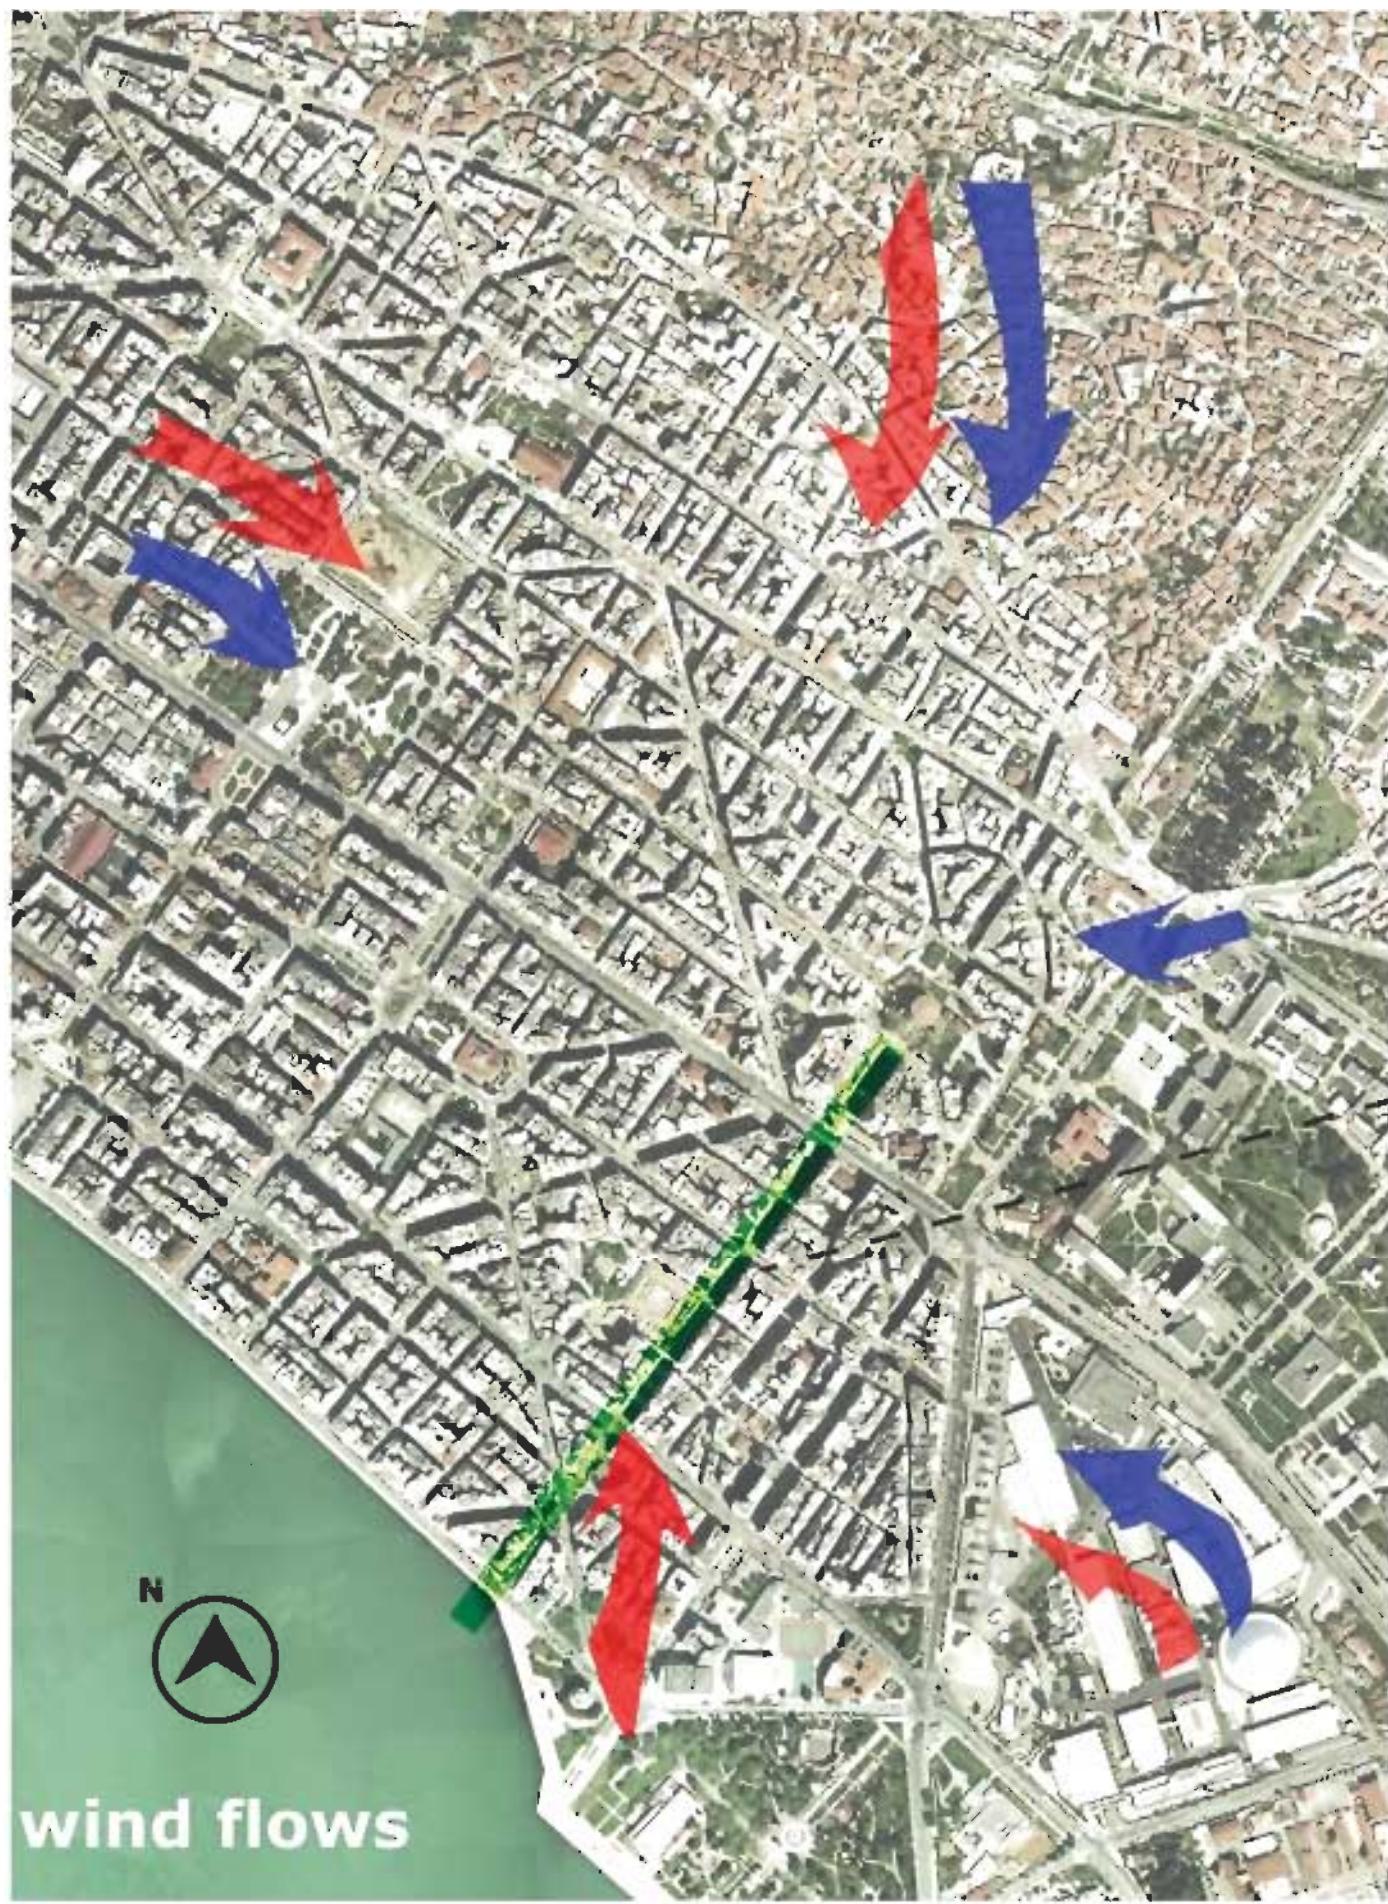

**Rotunda:** 300 A.C. - Pantheon and mausoleum of Galerius

**Arc of Galerius:** 305 A.C. - Celebration monument of the victorious campaign against the Persians

**Galerian Palace:** 4th Century A.C.

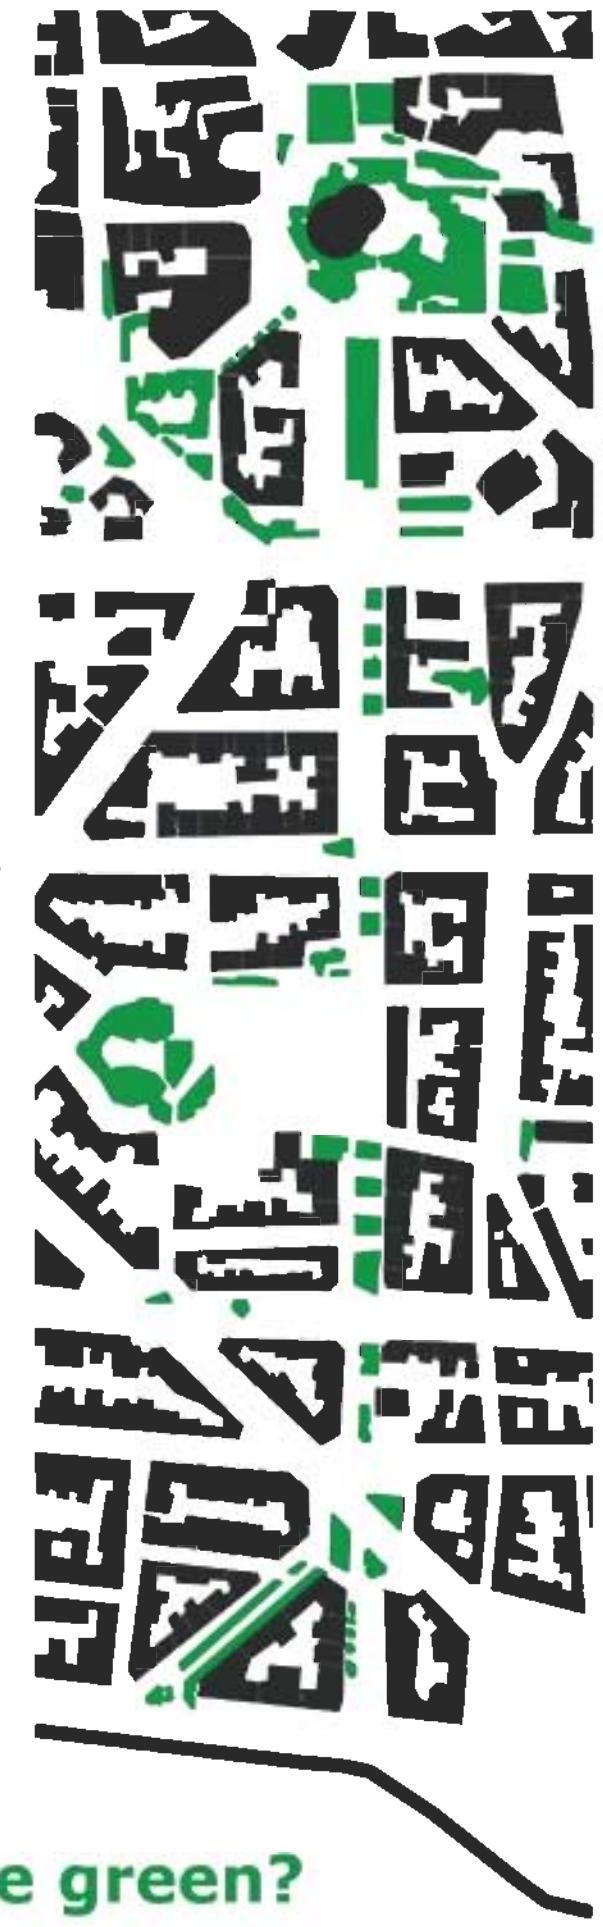

## A. ANALYSIS

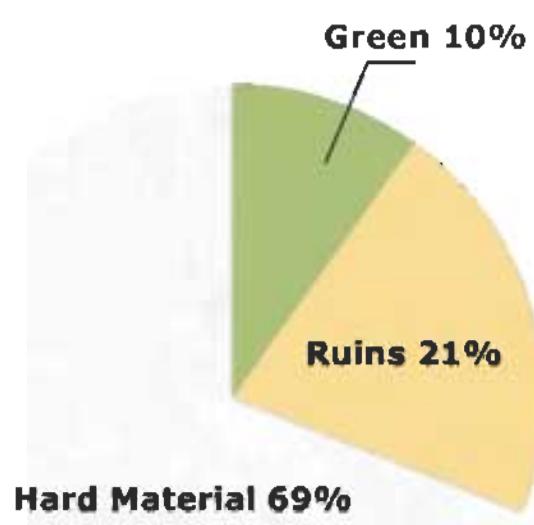

Wide streets such as Gounari str. contribute to the empowering of the wind flows in the city grid

a densely-built area with lack of green spaces

**where is the green?**

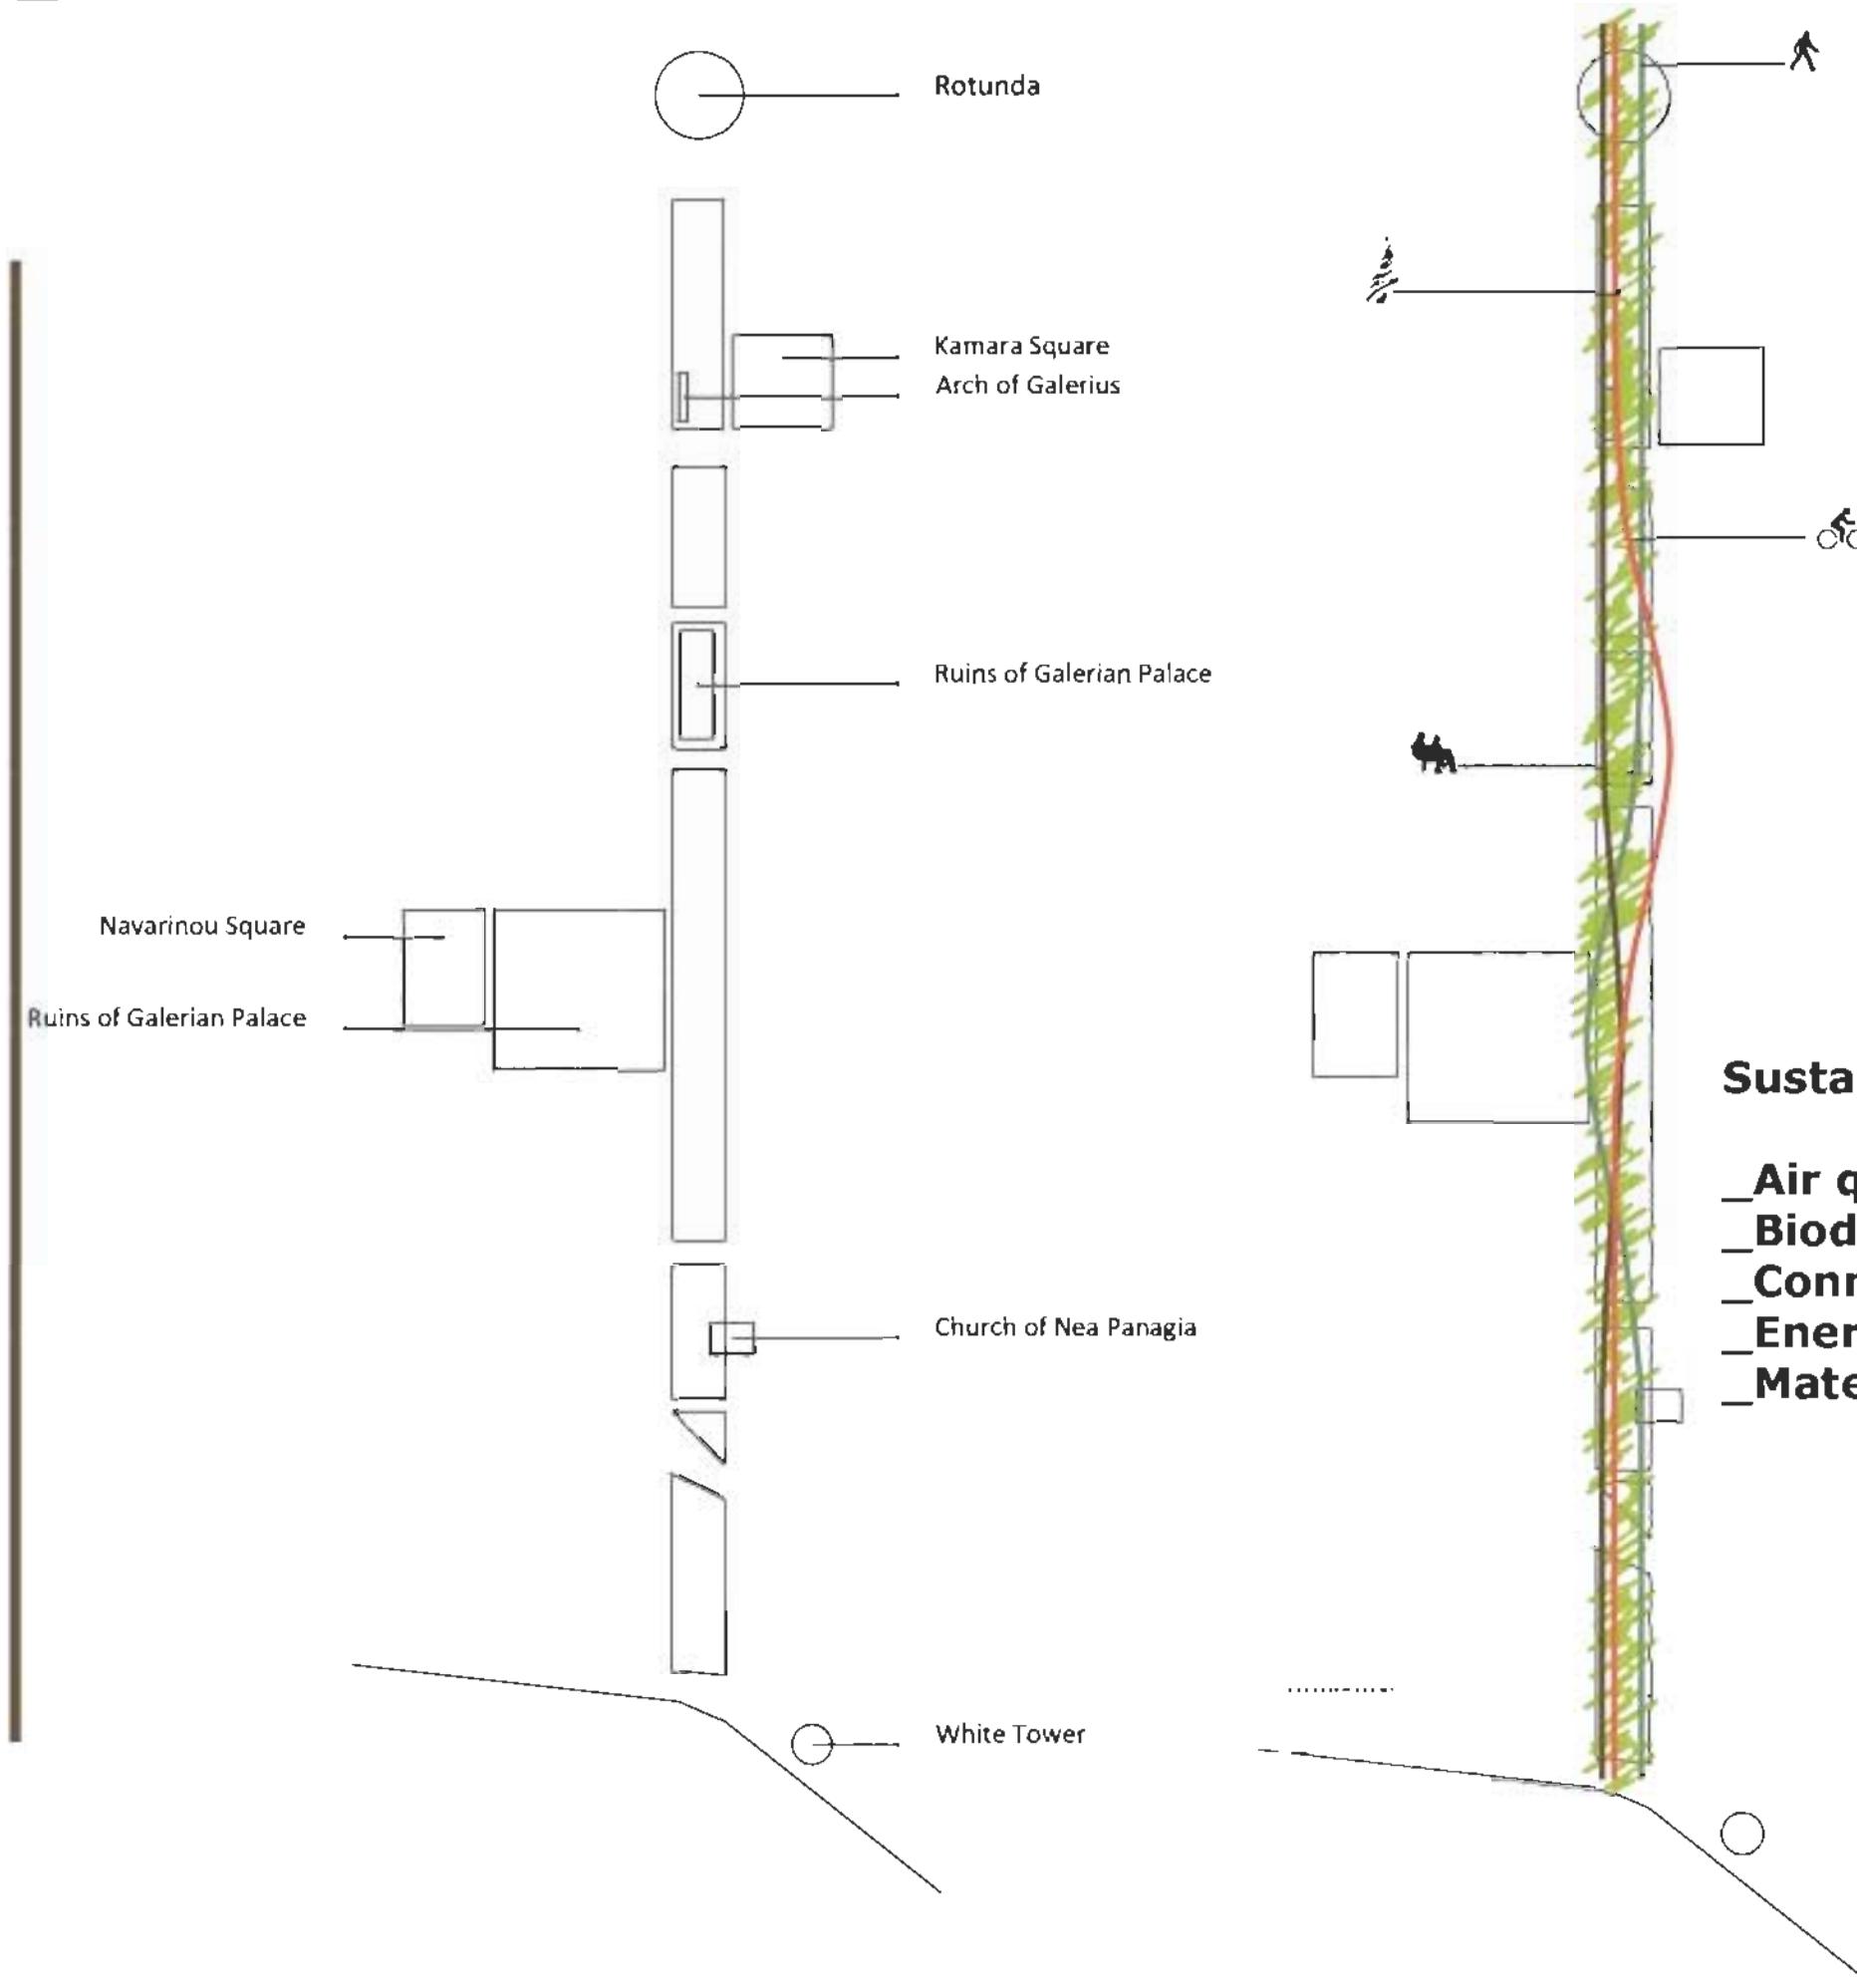

## B. ANALYSIS RESULTS\_MAIN CONCEPT

**BROKEN AXIS**

**LACK OF GREEN AREAS**

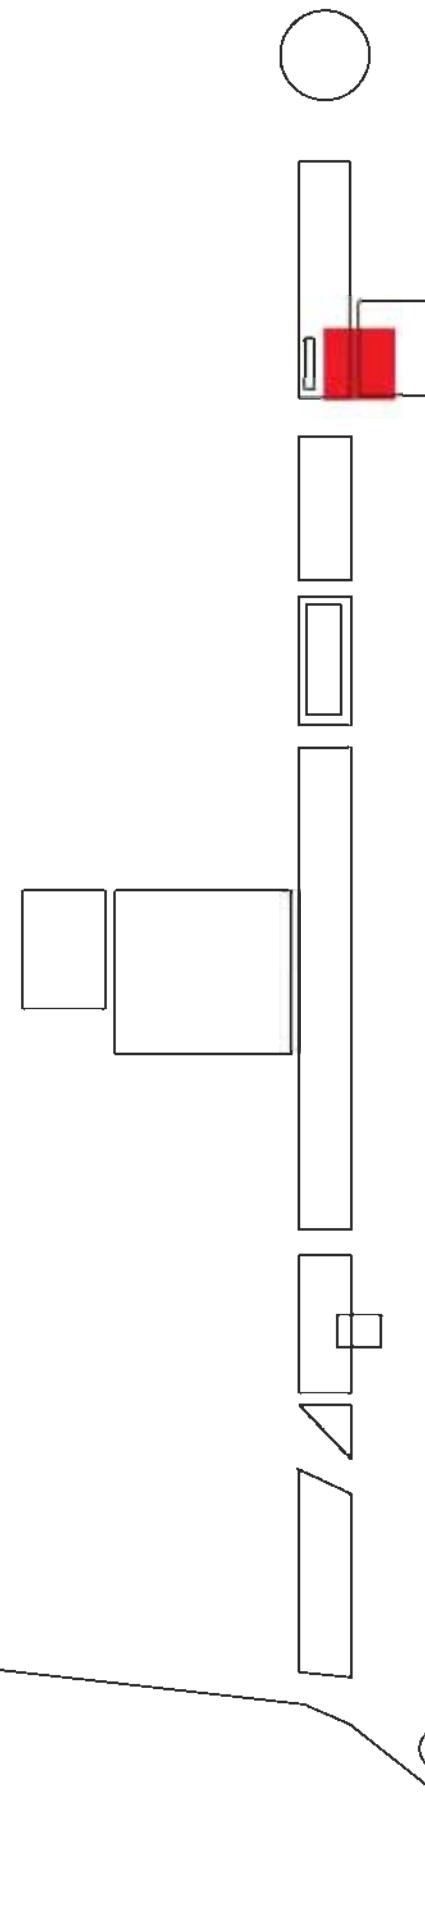

**UNUSED SPACES**

### Sustainability Goals:

- Air quality heritage**
- Biodiversity**
- Connection to nature**
- Energy**
- Materials**

## C. FOCAL POINTS

**Incorporate sustainable design**
