## \_what is Ephemera ?

an item or a situation  
which lasts for a limited period of time  
a significant experience  
which can become a pleasant memory

## \_concept

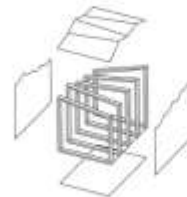

\_step1:  
we've got the  
shape of a cube.

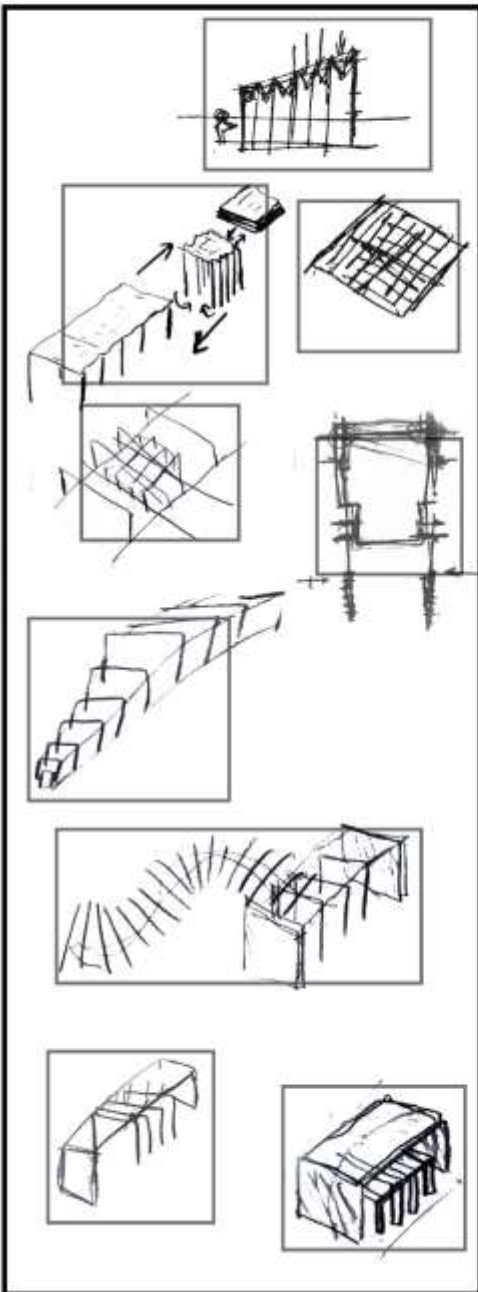

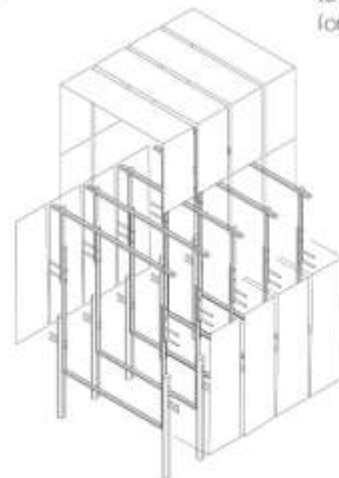

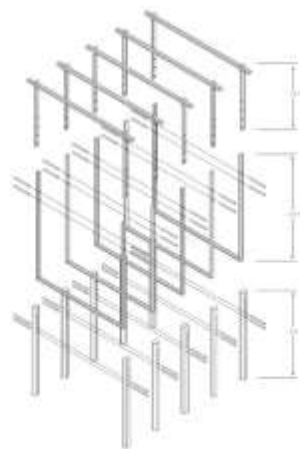

\_step2:  
the cube  
is separated into  
parallel fragments

\_step3:  
a square central part  
is separated away

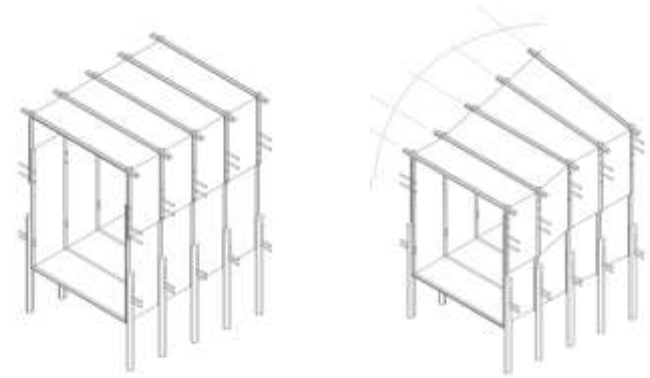

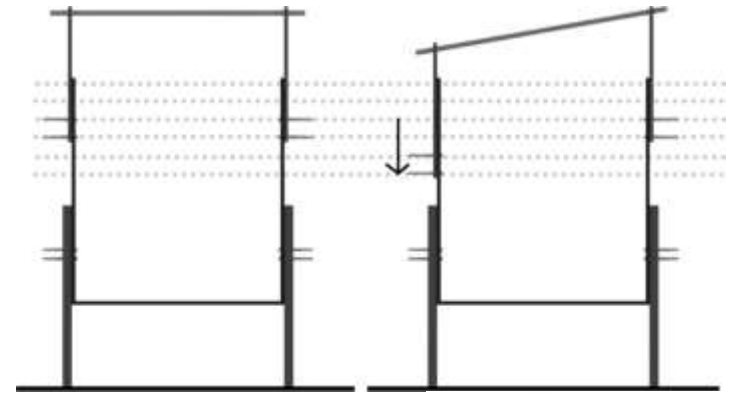

\_step4:  
the upper sides of the  
wireframes are reformed  
to create unique  
formations

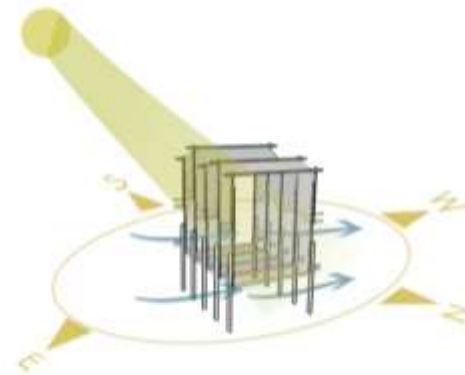

# design

unit adjustment on the ground

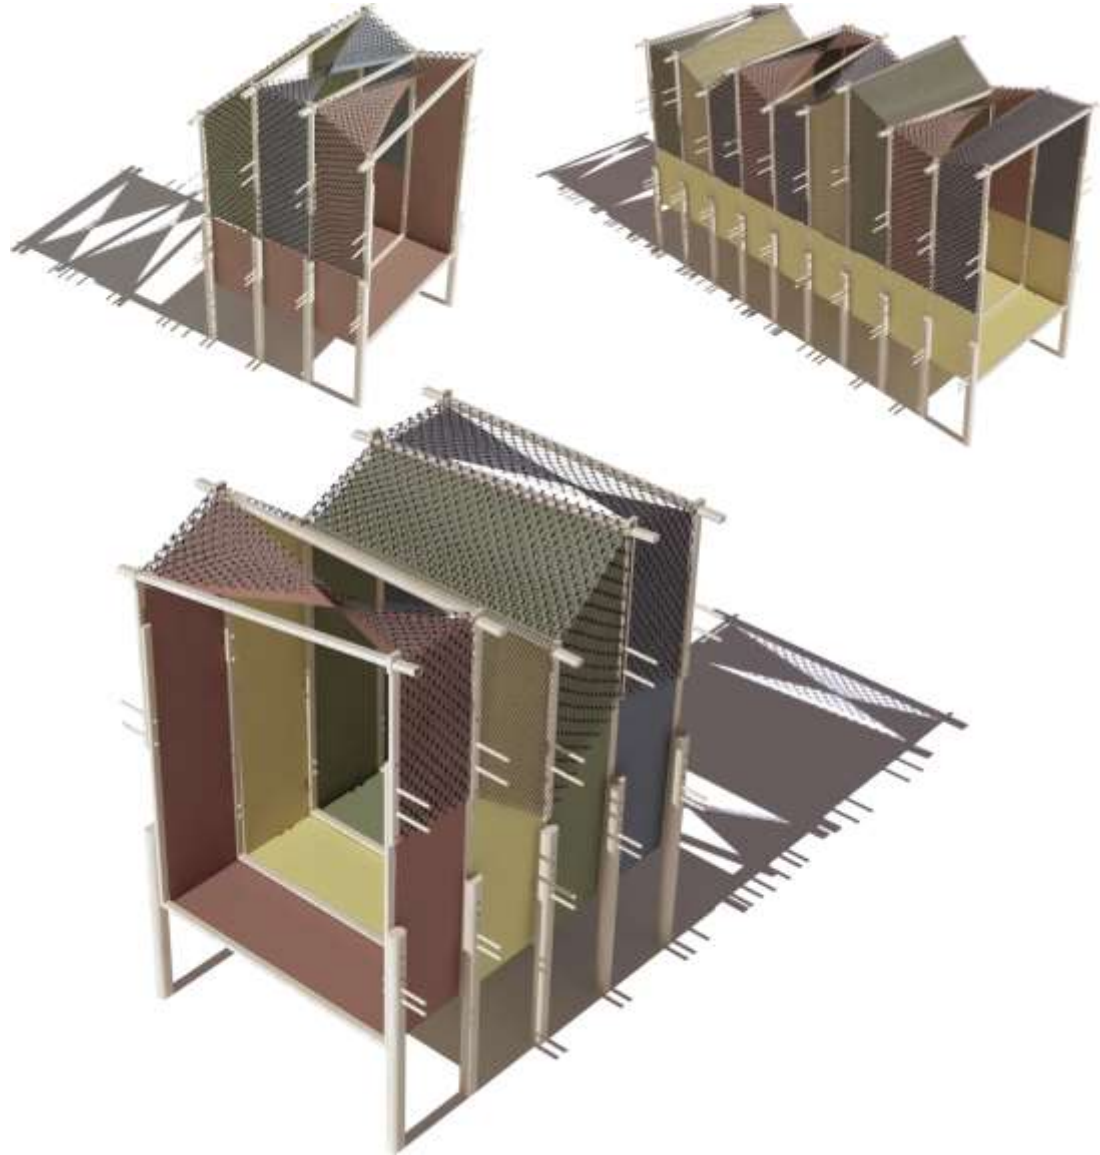

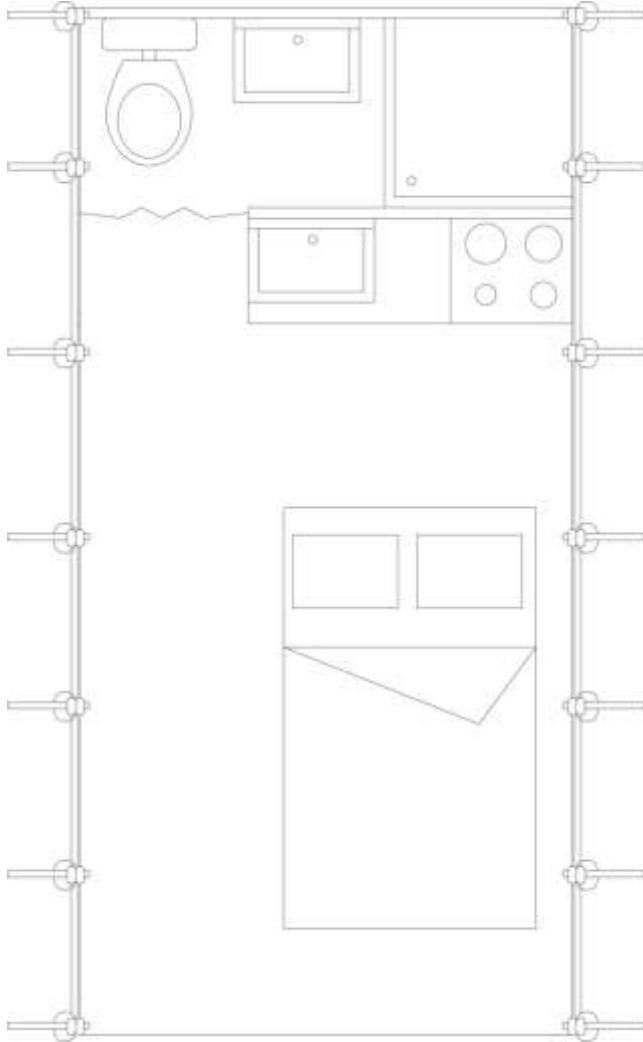

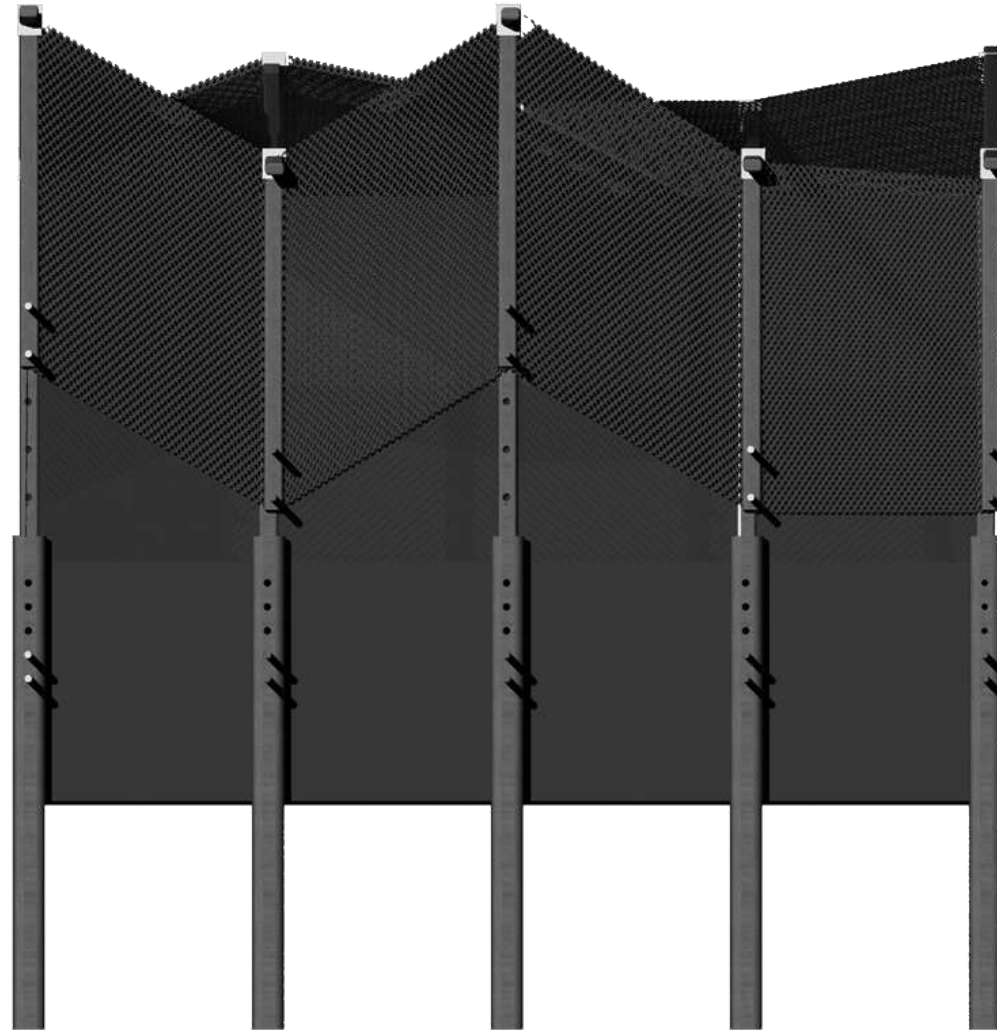

frames can formulate the roof height and form

# design

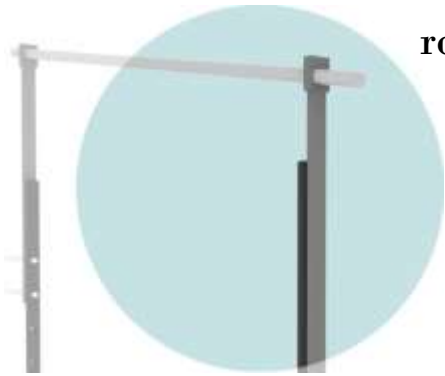

a typical floor plan of a big unit

structure flexibility

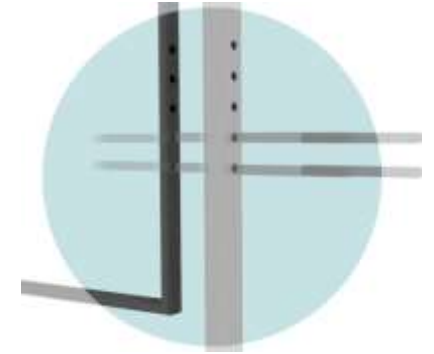

# assembly

roof assembly

the parts are held together by sticks inserted simultaneously in the frame and column side holes

floor assembly

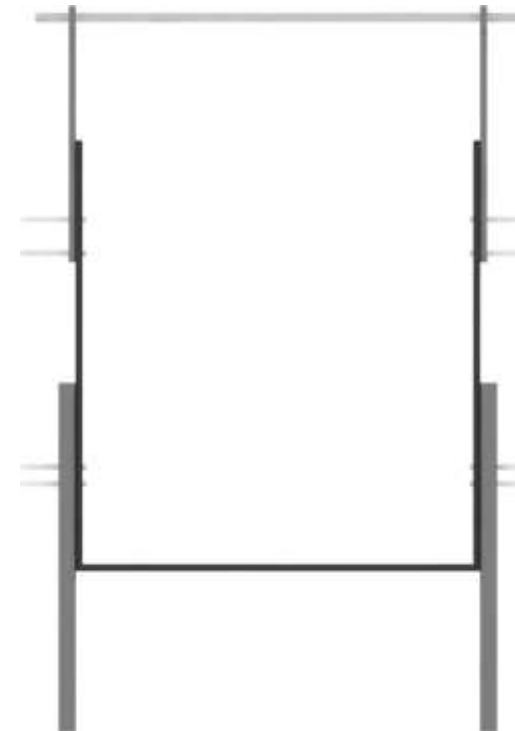

roof "Π" shaped frame

floor "Π" shaped frame

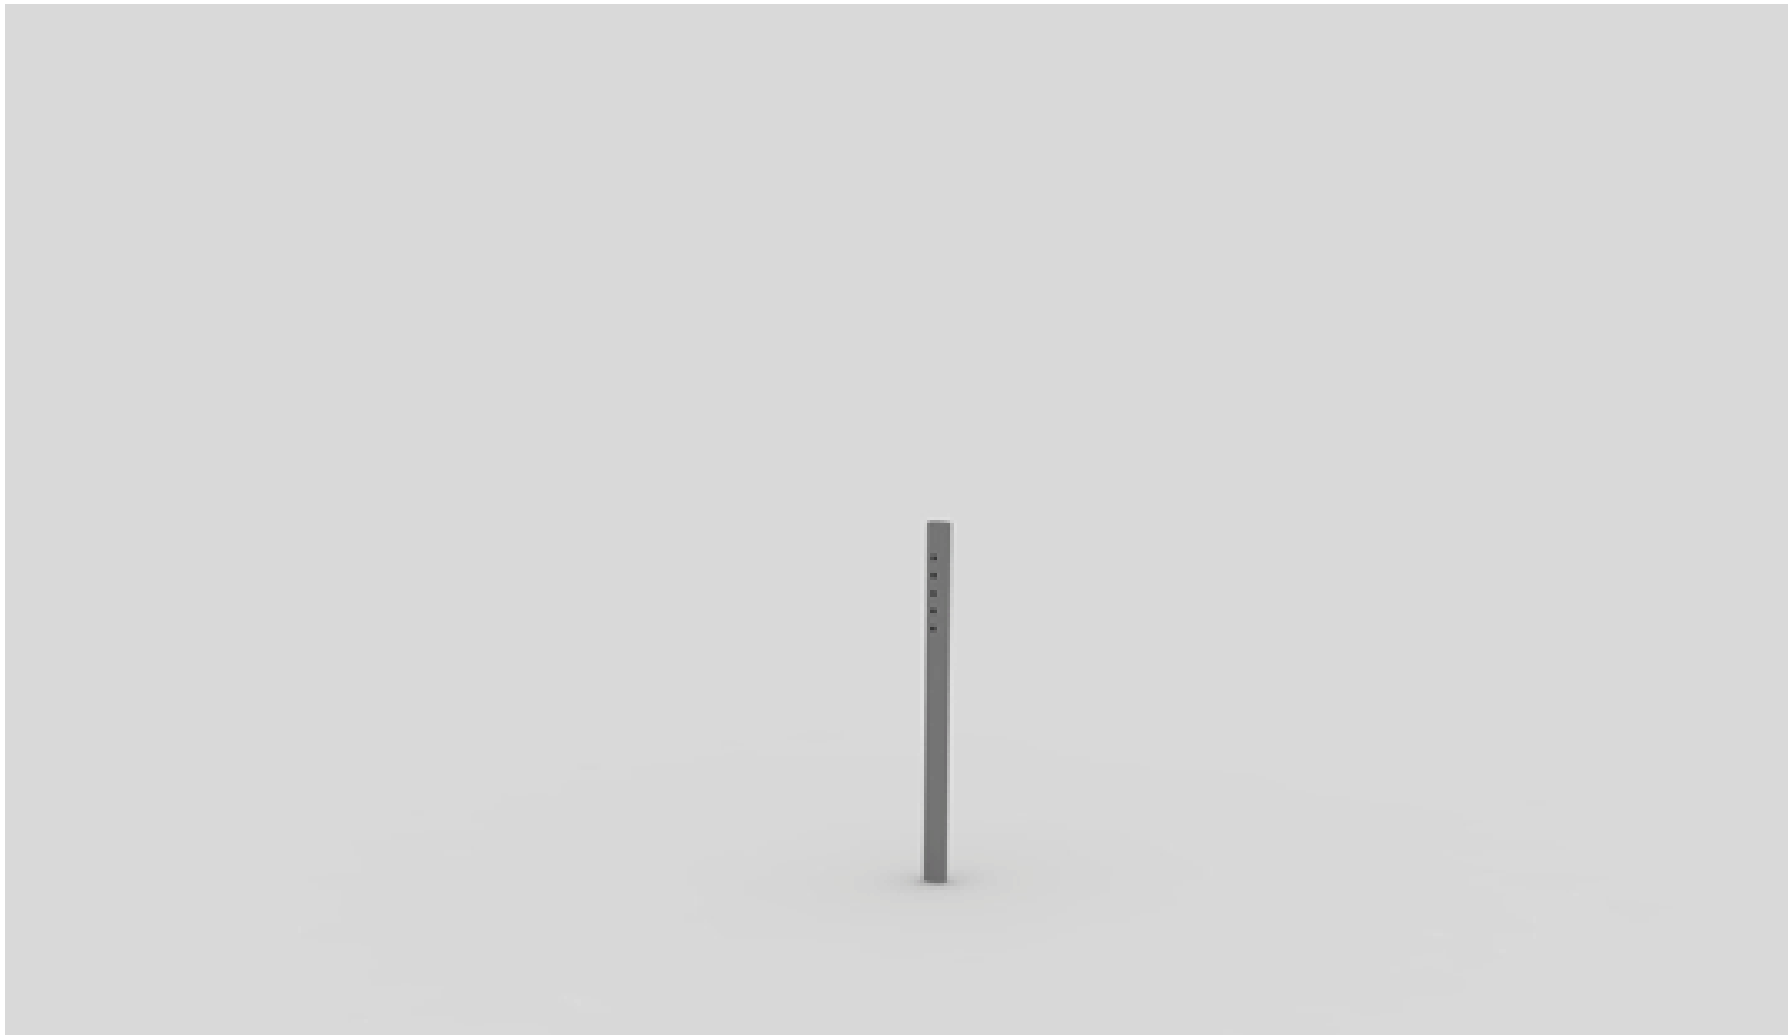

foundation columns

complete structural component

# assembly

# case studies

## Prasonisi

- \_location: southeast Greece  
a small isle to the south of the island of Rhodes
- \_ground: sand and gravel
- \_climate: humid, tranquil winters, cool summers, high temperatures during autumn, intense winds
- \_ephemeral character: winter - a land is covered completely by the sea /summer - the coastal front expands
- \_suggested habitation: units placed sideways, forming two imaginary lines along the coasts and leaving a middle narrow space for movement

## Nestorio

- \_location: northwest Greece, Aliakmonas River
- \_climate: temperate, humid, cold winters, dry, overcast summers.
- \_ground: rocky and mountainous
- \_trivia: every year, there is a weekly music festival running in Nestorio during August.
- \_suggested habitation: the units can be placed freely, concentrated on the riverfront, especially on specific spots where land nearly invades the current
