

W2: THEME C : New Building Sustainability - Towards a zero emissions energy-autonomous building.

"Green Parasite" - during the workshop we will work to design a new-green-café-concept project as infill in Rome.

A manageable project where in the course of the days when from a whole to the detail. We are working with context and the climatic conditions that make itself locally applicable and which have an effect on the design to the building. We will be dealing with new and established sustainable opportunities. In addition sustainable building materials - both new and old - high technology and low technology.

The workshop will be hosted in the center of Rome (near Piazza dell Orologio – not confirmed yet).
